Project: Innovation Processes, Innovative Capacities and Resources and Organisational Learning

About the course

Subject
Social Entrepreneurship and Management

Activity Type
master course

Teaching Language
English

Registration
Tilmelding sker via stads selvbetjening indenfor annonceret tilmeldingsperiode, som du kan se på Studieadministrationens hjemmeside.

Når du tilmelder dig kurset, skal du være opmærksom på, om der er sammenfald i tidspunktet for kursusafholdelse og eksamen med andre kurser, du har valgt. Uddannelsesplanlægningen tager udgangspunkt i, at det er muligt at gennemføre et anbefalet studieforløb uden overlap. Men omkring valgfrie elementer og studieplaner som går ud over de anbefalede studieforløb, kan der forekomme overlap, alt efter hvilke kurser du vælger.

Registration is happening through stads selvbetjening within the announced registration period, as you can see on the Studyadministration homepage.

When registering for courses, please be aware of the potential conflicts between courses or exam dates on courses. The planning of course activities at Roskilde University is based on the recommended study programs which do not overlap. However, if you choose optional courses and/or study plans that goes beyond the recommended study programs, an overlap of lectures or exam dates may occur depending on which courses you choose.

Detailed description of content
The module’s project work must focus on one or more of the areas of the Master’s module by combining theoretical and practical studies of social entrepreneurship and applying theories and tools in order to understand organisational development, social innovation and entrepreneurship. The student should demonstrate a thorough knowledge of innovation processes in relation to social entrepreneurship, and the ability to apply theoretical knowledge in practice. The project must be based on clear, problem-oriented cases, and demonstrate good methodological understanding. Also, it must be based on thorough theoretical review, and fulfil the criteria from Appendix 2.

Project process
The project starts with group formation, which takes place in the first week of the semester. The midterm evaluation takes place in groups with supervisors and an opponent group that gives feedback on a draft for the project. The project group will have a supervisor to guide them through the process.

The exact dates of the group formation, midterm evaluation, project hand-in and defence will follow.

Expected work effort (ects-declaration)
The project work corresponds to 15 ECTS = 405 work hours in total per student in the group.

Course material and reading list
Students choose the literature for the project based on the chosen theme and research question.

Evaluation and feedback forms
The project work has a midterm evaluation with another group and their supervisor where the groups give feedback on drafts of the project.

Administration of exams
IMT Studyadministration (imt-studyadministration@ruc.dk)

The responsible course lecturer
Luise Li Langergaard (luiseli@ruc.dk)
Group examination for the participants in the project work.

The examination is based on the students' project report.

The examination is conducted as a dialogue between the students and the assessors.

During the examination, questions may be asked concerning the academic area related to the project report.

An individual assessment is made on the basis of the project report and the individual student's oral presentation.

The assessment is an overall evaluation of the project report and the oral presentation.

The groups may consist of 2 to 7 students. The size specifications for the project report is:

- For 2 students, between 100,800 - 151,200 characters, including spaces.
- For 3 students, between 100,800 - 151,200 characters, including spaces.
- For 4 students, between 151,200 - 204,000 characters, including spaces.
- For 5 students, a minimum of 151,200 and a maximum of 204,000 characters, including spaces.
- For 6 students, between 204,000 - 240,000 characters, including spaces.
- For 7 students, between 204,000 - 240,000 characters, including spaces.

The size specifications include the title page, table of contents, bibliography, figures, and other illustrations, but does not include any potential appendixes or annexes.

Time allowed for examination, including time used for assessment:

- For groups of 2 students - 60 minutes.
- For groups of 3 students - 75 minutes.
- For groups of 4 students - 90 minutes.
- For groups of 5 students - 105 minutes.
- For groups of 6 students - 120 minutes.
- For groups of 7 students - 135 minutes.

The assessment includes the quality of the spelling and clarity of expression in the project report.

Permitted support and preparation materials during the examination: All.

- Problem area, research question and problem formulation
- Planned research design, including the methods and theories to be applied and possibly what type of empirical study that is planned in connection with the project
- A consideration of the possible conclusions
- A plan for the completion of the project

The assignment must be between 28,800 characters, including spaces, and 36,000 characters, excluding spaces.

The size specifications include the title page, table of contents, bibliography, figures, and other illustrations, but does not include any potential appendices.

Assignments that do not comply with these size specifications will not be assessed, and one exam attempt will have been used.

A study portfolio must be submitted together with the project report of between 4,800 characters and 9,600 characters, incl. spaces.

Re-examination, if the conditions for taking the exam are not met:
No more than two weeks after the date of the mid-term evaluation, an individual written assignment must be submitted of between 9,600 characters, incl. spaces, and 12,000 characters, incl. spaces. The size specifications include the title page, table of contents, bibliography, figures, and other illustrations, but does not include any potential appendices. Assignments that do not comply with these size specifications will not be assessed, and one exam attempt will have been used.

The assignment should briefly account for the main points in the feedback group’s assignment and give the group feedback on how to continue work on their project. The supervisor will assess whether the feedback given is satisfactory.
