

## Specialisation Project

Title	Specialisation Project
Semester	F2023
Master programme in	Mathematical Bioscience
Type of activity	Project
Teaching language	English
Study regulation	Read about the Master Programme and find the Study Regulations at <a href="https://ruc.dk">ruc.dk</a>  Læs mere om uddannelsen og find din studieordning på <a href="https://ruc.dk">ruc.dk</a>

### REGISTRATION AND STUDY ADMINISTRATIVE

Registration	<p>Sign up for study activities at <a href="https://stads.selvbetjening.ruc.dk">stads selvbetjening</a> within the announced registration period, as you can see on the <a href="https://stads.selvbetjening.ruc.dk">Studyadministration homepage</a>.</p> <p>Registration for project-exam: Please remember to confirm your registration by signing up for exam as a group when the group formation is final. The registration is through <a href="https://stads.selvbetjening.ruc.dk">stads selvbetjening</a></p> <p>When signing up for study activities, please be aware of potential conflicts between study activities or exam dates.</p> <p>The planning of activities at Roskilde University is based on the recommended study programs which do not overlap. However, if you choose optional courses and/or study plans that goes beyond the recommended study programs, an overlap of lectures or exam dates may occur depending on which courses you choose.</p>
Number of participants	
ECTS	15
Responsible for the activity	Jesper Schmidt Hansen ( <a href="mailto:jschmidt@ruc.dk">jschmidt@ruc.dk</a> )
Head of study	Jesper Schmidt Hansen ( <a href="mailto:jschmidt@ruc.dk">jschmidt@ruc.dk</a> )
Teachers	
Study administration	INM Registration & Exams ( <a href="mailto:inm-exams@ruc.dk">inm-exams@ruc.dk</a> )
Exam code(s)	U60170

### ACADEMIC CONTENT

Overall objective	The overall purpose of the project is that the student specialises in a concrete competence, obtain specific skills, and/or make preparatory studies for the thesis project.
Detailed description of content	<p>The specialisation project allows the student to obtain a specific skill, and/or make preparatory studies for the thesis project.</p> <p>The skill can, for example, be in-depth knowledge in the history of science in a specific exemplary topic, an in-depth knowledge, ability to reflect on and apply one or more specific biological laboratory techniques, in-depth knowledge about an advanced mathematical analysis methods, and/or highly specialized numerical methods.</p>
Course material and Reading list	<p>The project curriculum will vary depending on the project theme and specific research question.</p> <p>Relevant literature, software code, lab methods, and so forth are discussed with the supervisor.</p>
Overall plan and expected work effort	<p>The project is worth 15 ECTS points (405 hours).</p> <p>The following are based on estimates and will vary significantly depending on the specific project:</p> <ul style="list-style-type: none"> <li>• Semesterstart and group formation: ~ 10 hours</li> <li>• Project-formulation and presentation seminars: 2-4 hours</li> <li>• Supervision: 15 - 25 hours</li> <li>• Project work: ~350-380 hours</li> <li>• Exam: 30 min</li> </ul>
Format	
Evaluation and feedback	<p>All projects' processes will include ongoing dialogue-based (oral) evaluation between the students and the supervisor. Both students and supervisors are expected to provide constructive feedback and viewpoints during the process. Feedback concerning the academic content and progression, process and collaboration.</p> <p>Every other year when the projects are handed in, there will also be an evaluation through a questionnaire in SurveyXact. The Study Board will handle all evaluations along with any comments from the head of study.</p> <p>Furthermore, students can, in accordance with RUCs 'feel free to state your views' strategy through their representatives at the study board, send evaluations, comments or insights from their project process to the study board during or after the project process.</p>
Programme	<p>At the beginning of the semester the students will form groups defined by a theme or research question of their choosing. This choice can be facilitated by the supervisors or originate from the students.</p> <p>The study activity is based around PPL, where the group work independently and critically with the topic. This includes finding, reading, and understanding relevant literature, having regular productive group meetings, propose relevant scientific methods, models, or/and analysis that can lead to an answer to the research question, composing text for the final project project, and more.</p>

The project students agree with the supervisor on a regular meeting schedule; in order for the meetings to be fruitful the students must have an agenda and be well prepared for each meeting.

## ASSESSMENT

Overall learning outcomes

After the project the student will be able to

- demonstrate in-depth knowledge in the history of science in a specific exemplary topic within biology, mathematics, and/or integrated science (reflection variant) OR
- demonstrate in-depth knowledge, ability to reflect on and apply one or more specific biological laboratory techniques, specific advanced mathematical analysis methods, and/or highly specialized numerical methods AND/OR
- perform critical analysis and reflect on the usage of results from complex/large data set provided by student's own laboratory work or data from the literature AND/OR
- perform critical analysis and reflect on the usage of results from one or more mechanism-based mathematical models describing a biological system as an example of a general system in natural science.
- independently formulate a research problem/hypothesis based on relevant literature, organize, and manage project/group work.
- communicate the conclusion from the research question in a clear, concise, and reflected manner

Form of examination

Oral project exam in groups with individual assessment.

Permitted group size: 2-7 students.

The character limits of the project report are:

For 2 students: 24,000-307,200 characters, including spaces.

For 3 students: 24,000-307,200 characters, including spaces.

For 4 students: 24,000-307,200 characters, including spaces.

For 5 students: 24,000-307,200 characters, including spaces.

For 6 students: 24,000-307,200 characters, including spaces.

For 7 students: 24,000-307,200 characters, including spaces.

The character limits include the cover, table of contents, summary, bibliography, figures and other illustrations, but exclude any appendices.

The project report must include a summary in English, that is part of the assessment.

Time allowed for exam including time used for assessment is for:

2 students: 60 minutes.

3 students: 75 minutes.

4 students: 90 minutes.

5 students: 105 minutes.

6 students: 120 minutes.

7 students: 135 minutes.

Writing and spelling skills in the project report are part of the assessment.

Permitted support and preparation materials at the oral exam: All

Assessment: 7-point grading scale.

Moderation: Internal co-assessor.

Form of Re-examination	Samme som ordinær eksamen / same form as ordinary exam
Type of examination in special cases	
Examination and assessment criteria	<p>Oral project exam in groups with individual assessment. The students begin the exam with a presentation with a duration of 8-10 min. each on a topic related to the project. After the presentation there will be a dialogue between the students, supervisor and co-assessor, specific questions may be asked to individual students.</p> <p>The assessment criteria of the written part</p> <ul style="list-style-type: none"> <li>• demonstrate in-depth knowledge in the history of science in a specific exemplary topic within biology, mathematics, and/or integrated science (reflection variant) OR</li> <li>• demonstrate in-depth knowledge, ability to reflect on and apply one or more specific biological laboratory techniques, specific advanced mathematical analysis methods, and/or highly specialized numerical methods AND/OR</li> <li>• perform critical analysis and reflect on the usage of results from complex/large data set provided by student's own laboratory work or data from the literature AND/OR</li> <li>• perform critical analysis and reflect on the usage of results from one or more mechanism-based mathematical models describing a biological system as an example of a general system in natural science.</li> <li>• independently formulate a research problem/hypothesis based on relevant literature, organize, and manage project/group work.</li> <li>• communicate the conclusion from the research question in a clear, concise, and reflected manner</li> </ul> <p>The assessment of the oral exam is based on the student's ability to meet the criteria mentioned above and their ability to</p> <ul style="list-style-type: none"> <li>• clearly present and communicate the scientific content of the project</li> <li>• engage in a scientific dialogue and discussion with the supervisor and co assessor</li> </ul> <p>Furthermore, whether the performance meets all formal requirements in regard to both for the written og oral exam</p>

Exam code(s) Exam code(s) : U60170

Course days:

Hold: 1

## Specialisation Project - Introduction (MathBio)

time	01-02-2023 10:15 til 01-02-2023 12:00
forberedelsesnorm	ikke valgt
forberedelsesnorm D-VIP	ikke valgt
location	27.1-052 - lokale 2 (20)

## Specialisation Project - Forum 1 (MathBio)

time	01-02-2023 12:15 til 01-02-2023 13:00
forberedelsesnorm	ikke valgt
forberedelsesnorm D-VIP	ikke valgt
location	27.2-054 - lokale 3 (40)

## Specialisation Project - Project Presentation (MathBio)

time	01-02-2023 14:00 til 01-02-2023 16:00
forberedelsesnorm	ikke valgt
forberedelsesnorm D-VIP	ikke valgt
location	27.1-089 - teorirum 27 (66)
Teacher	Nicholas Bailey ( nbailey@ruc.dk )

## Specialisation Project - IMFUFA Breakfast (canteen in bulding 27) (MathBio)

time	02-02-2023 09:15 til 02-02-2023 10:00
------	--

## Specialisation Project - Forum 2 (MathBio)

time	02-02-2023 10:15 til 02-02-2023 12:00
------	--

forberedelsesnorm ikke valgt  
forberedelsesnorm D-VIP ikke valgt  
location 27.2-054 - lokale 3 (40)

## Specialisation Project - Forum 3 (MathBio)

time 03-02-2023 12:15 til  
03-02-2023 16:00  
location 27.1-089 - teorirum 27 (66)

## Specialisation Project - Problem Formulation Seminar (MathBio)

time 08-03-2023 14:00 til  
08-03-2023 16:00  
location 27.1-089 - teorirum 27 (66)  
Teacher Nicholas Bailey ( nbailey@ruc.dk )

## Specialisation Project - Hand-in of project

time 24-05-2023 10:00 til  
24-05-2023 10:00  
forberedelsesnorm ikke valgt  
forberedelsesnorm D-VIP ikke valgt

## Specialisation Project - Project examination

time 20-06-2023 08:15 til  
22-06-2023 18:00  
forberedelsesnorm ikke valgt  
forberedelsesnorm D-VIP ikke valgt

## Specialisation Project - Project reexamination

time 01-08-2023 08:15 til  
31-08-2023 18:00  
forberedelsesnorm ikke valgt

forberedelsesnorm ikke valgt  
D-VIP
