## ACADEMIC CONTENT

Overall  
objective

A specialisation course aims to allow students to immerse themselves in the theories/theory lines and empirical issues pertaining to a particular subject area. The course equips students to competently select and argue for the applicability and relevance of a theory/theory line to given issues. The courses offered are based on the Institute's research in the field and knowledge of the highest international standard. The specific subject area of the courses will be described in the activity description.

Current Global and Development Challenges and Solutions addresses various global and development challenges, such as conflicts, questions of justice, inequality, sustainability, and effects for instance on states, markets and civil society.

Detailed  
description of  
content

### Overall objective

The changing nature of global capitalism has had dramatic consequences for labour in terms of the nature and organisation of work and workers locally and globally. In this course, we employ a range of theoretical perspectives to explore the interactions between labour and the changing nature of global capitalism with particular attention to the global South. We examine the changing role of labour in the international political economy focusing on transnational production, trade and finance as well as the deregulation and reregulation of labour. We also examine ways that labour has, both locally and globally, been changed by these processes and importantly, how labour is responding to these changes. A focus on social reproduction and the climate and ecological emergency are a central part of these discussions.
